

Customer Journey Map

Customer Journey Map

Stage	User Actions	User Thoughts	User Feelings	Pain Points	System Opportunities
Login	Logs into the ServiceNow portal using valid credentials.	"I hope I can access the system without any issues."	Confident	Login failures or incorrect permissions.	Secure authentication and quick login process.
Access Request	Requests access to a project, group, or specific role.	"The request process should be simple and fast."	Hopeful	Confusing forms and manual request submission.	Easy-to-use request forms with automated workflows.
Approval Process	Waits while the manager reviews the request.	"I want to know the status of my request."	Anxious	Delayed approvals and lack of status updates.	Automated approval workflow with real-time notifications.
Role & Group Assignment	Receives the assigned role and group after approval.	"I should receive only the permissions I need."	Satisfied	Incorrect role assignments or excessive permissions.	Role-Based Access Control (RBAC) and automated group assignment.
Task Execution	Performs assigned project tasks using authorized access.	"Everything I need should already be available."	Productive	Missing permissions or restricted resources.	Proper ACL configuration to ensure secure and appropriate access.
Completion & Monitoring	Completes tasks and receives confirmation. Administrators	"My work is completed successfully and securely."	Confident	Limited audit tracking and manual monitoring.	Activity logs, audit trails, and automated notifications for transparency.
