

PROJECT DEVELOPMENT PHASE

Date	
Team Id	SWTID-2026-8336
Project Name	Optimizing User, Group, and Role Management with Access Control and Workflows
Maximum Marks	

User Acceptance Testing:

User Acceptance Testing (UAT) is the final phase of testing where the developed system is validated by end users or stakeholders to ensure it meets the required business needs. In this project, UAT is conducted to verify that the User, Group, and Role Management with Access Control and Workflows system functions as expected from a user's perspective.

Purpose of Document :

The purpose of this document is to briefly explain the test coverage and defect status of the Optimizing User, Group, and Role Management with Access Control and Workflows project at the time of release to User Acceptance Testing (UAT). It ensures that all major functionalities such as user management, role assignment, group configuration, ACL enforcement, and workflow automation have been tested and verified before deployment.

Defect Analysis :

This section represents the summary of defects identified during testing and their resolution status across different severity levels.

Resolution Type	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	8	3	2	2	15
Duplicate	1	1	2	0	4
External	1	2	1	1	5
Fixed	10	5	6	18	39
Not Reproduced	0	0	1	0	1
Skipped	0	1	1	1	3
Won't Fix	1	2	1	1	5
Total	21	14	14	23	72

PROJECT DEVELOPMENT PHASE

Test Case Analysis:

This section shows the execution status of test cases for different modules of the system.

Module / Section	Total Cases	Not Tested	Fail	Pass
User Management	10	0	0	10
Group Management	8	0	0	8
Role Management	8	0	0	8
Access Control (ACL)	6	0	0	6
Workflow Automation	12	0	1	11
Approval System	10	0	0	10
Notifications	6	0	0	6
Audit Logging	5	0	0	5
Total	65	0	1	64
